Exam Accession# 12563361

XR CERVICAL SPINE 2 OR 3 VIEWS

HISTORY: F/U cervical spinal fusion.

COMPARISON: 01/02/2018.

FINDINGS: The prevertebral soft tissues are within normal limits. Anterior cervical discectomy and fusion extends from C5 to C7. Intervertebral spaces are in place and there is progressive fusion at the surgical site. Overall straightening of the upper cervical spine, which is unchanged. Mild disc space narrowing at the C4-C5 level, with anterior spurring, and also uncovertebral spurring, which is similar.

IMPRESSION: Satisfactory appearance of the anterior fusion from C5 to C7. Straightening of the upper cervical spine, which is unchanged.
